

T

TEMAZEPAM IS A DRUG THAT IS PRESCRIBED TO HELP PEOPLE SLEEP. ITS EGG SHAPED CAPSULES ARE OFTEN USED BY DRUG USERS. BECAUSE OF THIS, THE MAKERS CHANGED THE CAPSULES FROM A LIQUID TO A HARD GEL. THIS WAS TO TRY AND STOP USERS FROM INJECTING.

E

EVEN THOUGH THEY DID THIS, SOME PEOPLE STILL CARRIED ON INJECTING THE GEL, BY HEATING IT UP, MAKING IT RUNNY.

M

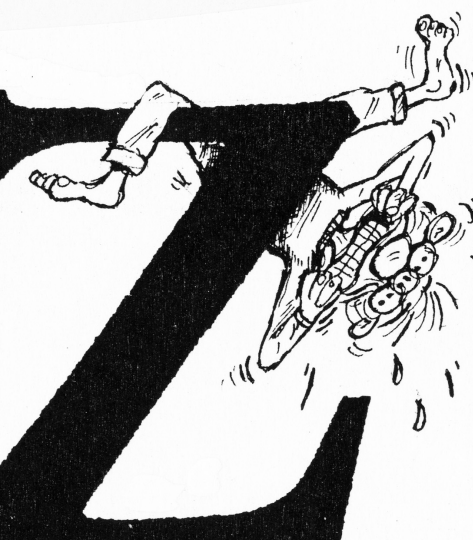

MANY PEOPLE HAVE FOUND OUT TO THEIR COST, THAT IF THE GEL IS HEATED AND THEN INJECTED, IT COOLS DOWN IN THE VEIN, FORMING HARD LUMPS THAT CAUSE BLOCKAGES IN THE BLOOD VESSELS.

A

A NUMBER OF PROBLEMS CAN DEVELOP FROM THIS LIKE GANGRENE. IT CAN BE VERY EMBARRASSING TO HAVE ONE OF YOUR FEET DROP OFF. A FEW USERS HAVE LOST LIMBS BECAUSE OF INJECTING THE GEL. SOME HAVE DIED.

Z

ZZARR BLURM BROOOOOPDING! HIGH LEVEL TEMAZEPAM USE COULD CAUSE YOU TO ACT OUT OF CHARACTER AND SOMETIMES LEADS TO VIOLENT BEHAVIOUR.

E

EATING TEMAZEPAM OR RATHER SWALLOWING IT WITH A HOT DRINK, CAN GIVE THE **SAME EFFECT** AS AN INJECTION. SO THERE IS NO NEED TO RISK IT.

P

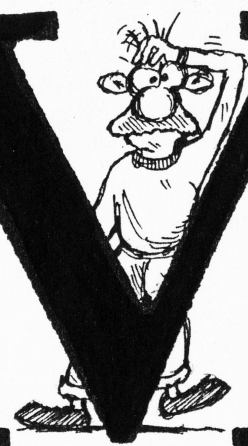

PROBLEMS ARISE IF YOU INJECT ANYTHING, PARTICULARLY TABLETS/ CAPSULES THAT ARE NOT MEANT TO BE INJECTED. THE **LIQUID** FILLED TEMAZEPAM CAPSULES ARE **NOT SAFE TO INJECT**, BUT THE **GEL** FILLED CAPSULES ARE **EVEN MORE HAZARDOUS**.

A

A WAY OF TELLING IF THE CAPSULES ARE LIQUID FILLED OR GEL FILLED: THE GREEN CAPSULES WITH GEL INSIDE HAVE **GELTHIX** WRITTEN ON ONE SIDE THE YELLOW CAPSULES WITH GEL INSIDE HAVE **W10** IN BLACK OR **W20** IN RED ON ONE SIDE. **DO NOT INJECT THESE CAPSULES!**

M

MEMORY LOSS AND THE POSSIBILITY OF BRAIN DAMAGE CAN RESULT FROM HIGH LEVEL USE OF TEMAZEPAM. SO REMEMBER THIS INFORMATION AND IF YOU WANT HELP, CONTACT YOUR LOCAL DRUG SERVICE (BACK PAGE)
