

LIFELINE PUBLICATIONS PRESENTS

TOOTING

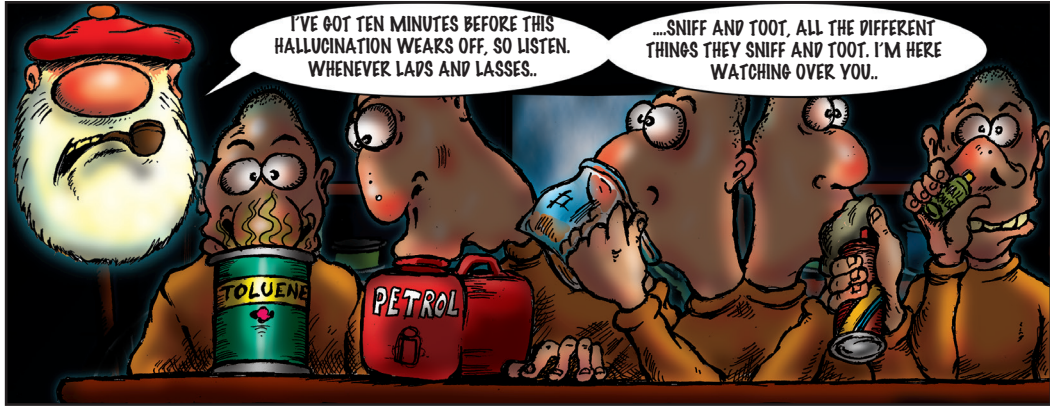

GAS

FEATURING

HOOTS M'TOOTS

I SEE OTHERS WHO PASS OUT, THEN CHOKe ON THEIR OWN VOMIT. KNOW WHAT HAPPENS TO THEM? **'KEN DEAD!'**. THAT'S WHY IT IS MORE DANGEROUS TOOTING ON YOUR OWN.

AND THEN SCARPER, RIGHT?

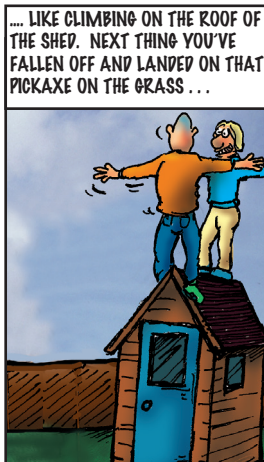

IF SOMEBODY HAS PASSED OUT PUT THEM ON THEIR SIDE LIKE THIS, SO THEY CAN'T ROLL ONTO THEIR BACKS. THAT WAY IF THEY'RE SICK THEY WON'T CHOKe. THEN CALL FOR AN AMBULANCE

WRONG!
NEVER LEAVE A 'KEN FRIEND BEHIND.
HE'S YOUR MATE LOOK AFTER HIM. IF HE DIED YOU'D BE IN FAR MORE TROUBLE ANYWAY.

OF COURSE, MUCKING ABOUT WHEN YOU'VE BEEN TOOTING CAN BE DANGEROUS AS WELL. YOU'LL END UP DOING SOMETHING DAFT...

.... LIKE CLIMBING ON THE ROOF OF THE SHED. NEXT THING YOU'VE FALLEN OFF AND LANDED ON THAT PICKAXE ON THE GRASS ...

...YOU'D BE **'KEN DEAD!'**

WHOOOPS!

LOOK AT THIS POSTER.
YOU HAVE JUST SQUIRTED LIGHTER FUEL,
WHICH IS **BUTANE GAS** DOWN YOUR THROAT.
SQUIRTING LIGHTER FUEL DIRECTLY INTO THE
MOUTH, IS NO LONGER THOUGHT TO KILL BY
FREEZING THE MUSCLES IN THE WINDPIPE -
IT IS NOW THOUGHT THAT LIGHTER FUEL
CAUSES DEATH FROM
HEART FAILURE.

LIGHTER
FUEL

BRAIN

SUDDEN SNIFFING DEATHS
ARE NOW THOUGHT TO BE CAUSED BY THE
EFFECT OF THE SUBSTANCE AND PARTLY
BY THE RELEASE OF ADRENALIN WHEN
YOU GET EXCITED OR PANICKY.

SO YOU SHOULD BE VERY CAREFUL YOU DON'T FRIGHTEN OR
PANIC SOMEONE WHO IS HIGH FROM SNIFFING

LISTEN !
I'VE TOOTED LOADS OF TIMES
AND I'M NOT
'KEN DEAD'
PEOPLE ALWAYS TELL US,
DRUGS ARE GONNA KILL US.
THEY LIE !

OCH AYE
THEY DO !

LOOK !
I LIKE A WEE
DRINK MYSELF

I KEEP A STASH
OF QUALITY WEEP
IN MY SPORRAN

AND I'M A
HALLUCINATION
SO I KNOW ALL
ABOUT ACID

LADS & LASSES
TODAY ARE GROWING
UP IN A WORLD FULL
OF DRUGS.

MOST PEOPLE WHO WANT
TO GET DRUNK; DRINK ALCOHOL.
IF THEY WANT TO GET STONED;
THEY SMOKE CANNABIS,
IF THEY WANT TO SEE THINGS;
THEY DROP ACID.

TWO OF THESE DRUGS ARE ILLEGAL.
ALL INVOLVE SOME RISK, BUT NOTHING LIKE
TOOTING GAS.
IT'S DIFFERENT

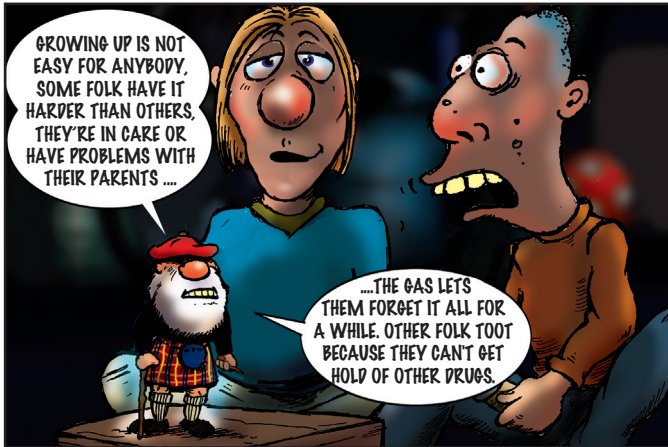

BLOODY
ACID !

TOOTING GAS IS UP THERE
WITH INJECTING HEROIN.
THIS IS REALLY
SCARY STUFF

EVEN IF YOU DON'T KILL
YOURSELF, WHAT'S GONNA HAPPEN?
THE ONLY MATES YOU WILL HAVE ARE
THOSE WHO TOOT GAS. GAS TOOTERS
ARE NOT IN THE KITCHEN AT PARTIES,
NOBODY INVITES THEM.

WHY DO YOU THINK
THERE IS NO DANCE MUSIC ABOUT
TOOTING GAS OR SPUFFY JACKETS WITH
CUTE LITTLE TOOTERS ON THE BACK.
YOUR MATES WHO DON'T TOOT WILL
THINK YOU ARE SAD & LONELY.

YOU'LL THINK
YOURSELF STUPID FOR DOING
IT, BUT YOU'LL STILL DO IT.
YOU'LL END UP ALL ON
YOUR OWN.

* Tooting Gas & Sniffing Solvents is NOT like smoking Cannabis or dropping Acid, it is as dangerous as **INJECTING HEROIN**. Every year it kills 50 or so young people.

* Tooting on your own is **MORE DANGEROUS** than tooting in a group.

* If somebody passes out and you can't wake them, put them on their side and call for an ambulance. **LOOK AFTER YOUR MATES!**

* If you feel you would have trouble stopping or want to talk to somebody, there are people who you can talk to **IN CONFIDENCE**. Ask the person who gave you this leaflet or some other adult you trust, to put you in touch with someone who can help.

FOR ADVICE & INFORMATION CONTACT

[] lifeline | publication guidelines

[>] **aims**
To make clear just how dangerous using volatile substances is and to deal with misconceptions. It also details the effects of misusing gas and solvents, including passing out, long-term damage and the high fatality rate of solvent users..

[>] **audience**
Young people engaged in recreational drug use. Use with under 16's with support (see catalogue or website)

[v] **content**
Some words that sound like swear words, cartoon images of drug taking and violent death.

[£] **funding**
Self financed.
